BECTION	4: FIRST AID MEASURES					
4.1	DESCRIPTION OF FIRST AID MEASURES: Symptoms may occur after exposure, so that in case of direct exposure to the product, when in doubt, or when symptoms persist, seek medical attention.Never give anything by mouth to an unconscious person.Lifeguards should pay attention to self-protection and use the recommended protective equipment if there is a possibility of exposure.Wear protective gloves when administering first aid.It can be dangerous to the person giving artificial respiration by mouth-to-mouth (the kiss of life).					
	Route of exposure	Symptoms and effects, acute and delayed	Description of first-aid measures			
		1 51	Remove the patient out of the contaminated area into the fresh air.If breathing is irregular or stops, administer artificial respiration.If the person is unconscious, place ir appropriate recovery position.Keep the patient warm and at rest until medical attention arrives.			

		headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, unconsciousness.	fresh air.If breathing is irregular or stops, administer artificial respiration.If the person is unconscious, place in appropriate recovery position.Keep the patient warm and at rest until medical attention arrives.			
	Skin:	cause skin dryness.	Remove immediately contaminated clothing.Wash thoroughly the affected area with plenty of cold or lukewarm water and neutral soap, or use a suitable skin cleanser.			
	Eyes:	Contact with the eyes produces redness and pain.	Remove contact lenses.Rinse eyes copiously by irrigation with plenty of clean, fresh water for at least 15 minutes, holding the eyelids apart, until the irritation is reduced.Call a physician immediately.			
	Ingestion:	If swallowed, may cause irritation of the throat, abdominal pain, drowsiness, nausea, vomiting and diarrhoea.	If swallowed, seek immediate medical attention. Do not induce vomiting, due to the risk of aspiration.Keep the patient at rest.			
4.2		PTOMS AND EFFECTS, BOTH ACUTE AND DE	LAYED:			
	The main symptoms and effects are indicated in sections 4.1 and 11.1					
4.3	INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT NEEDED:					
	Notes to physician:					
	The product inhaled during vomiting could cause lung damage. Thus, emesis should not be induced, neither mechanically nor					
	pharmacologically. In the case of ingestion, empty the stomach with caution.					
	Antidotes and contraindications: Specific antidote not known. In the case of a pneumonia by chemical agents, must be considered a therapy with antibiotics and					
	corticosteroids.	n the case of a pheumonia by chemical agents, must	be considered a therapy with antibiotics and

ECTION	6: ACCIDENTAL RELEASE MEASURES						
6.1	PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT AN	ND EMERGENCY PROCEDURES:					
	Eliminate possible sources of ignition and when appropriate, ventilat breathing vapours.Keep people without protection in opposition to		s product.Avoid				
6.2	ENVIRONMENTAL PRECAUTIONS: Avoid contamination of drains, surface or subterranean water and so		contaminates				
	lakes, rivers or sewages, inform the appropriate authorities in acco						
6.3	METHODS AND MATERIAL FOR CONTAINMENT AND CLEA Contain and mop up spills with non-combustible absorbent materials in a closed container.		Keep the remains				
6.4	REFERENCE TO OTHER SECTIONS:						
	For contact information in case of emergency, see section 1. For information on safe handling, see section 7.						
	For exposure controls and personal protection measures, see section	on 8					
	For waste disposal, follow the recommendations in section 13.						
ECTION	7: HANDLING AND STORAGE						
7.1	PRECAUTIONS FOR SAFE HANDLING:						
	Comply with the existing legislation on health and safety at work.						
	- <u>General recommendations:</u>						
	Avoid any type of leakage or escape. Keep the container tightly close						
	- Recommendations for the prevention of fire and explosion ri						
	Vapours are heavier than air, may spread along floors to a considera distant ignition sources and flame up or explode.Due to its flammak lights and other sources of ignition have been excluded and away fr smoke.No tools with a potential for sparks should be used.	pility, this material should only be used in areas from v	which all naked				
	Flashpoint	6* °C (Abel-Pensky)	CLP 2.6.4.3.				
	Autoignition temperature:	480* °C					
	Lower/upper flammability or explosive limits:	1,2* - 7,1* % Volume 25°C					
	Ventilation requirement:	177 m3/l	Air/Preparation				
	- Recommendations for the prevention of toxicological risks:						
	Do not eat, drink or smoke while handling.After handling, wash hand measures, see section 8.	ls with soap and water. For exposure controls and pers	sonal protection				
	- Recommendations for the prevention of environmental conta	amination:					
	It is not considered a danger to the environment. In the case of accid		ion 6.				
7.2	CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCO						
	Forbid the entry to unauthorized persons. Keep out of reach of child sources. Do not smoke in storage area. If possible, avoid direct cont leakages, the containers, after use, should be closed carefully and	act with sunlight. Avoid extreme humidity conditions. Ir	n order to avoid				
	- <u>Class of store:</u>						
	According to current legislation.						
	- Maximum storage period:						
	24 Months.						
	- <u>Temperature interval:</u>						
	min:5 °C, max:40 °C (recommended).						
	- Incompatible materials:						
	Keep away from oxidizing agents, acids.						
	<u>- Type of packaging:</u>						
	According to current legislation.						
	- Limit quantity (Seveso III): Directive 2012/18/EU:						
	- Named dangerous substances/mixtures:None						
	- Hazard categories and lower-/upperthreshold quantities in tonnes (t):						
	<ul> <li>Physical hazards:Highly flammable liquid and vapour. (P5c) (5000t</li> <li>Health hazards:Not applicable</li> </ul>	/50000t).					
	· Environmental hazards:Not applicable						
	<ul> <li>Other hazards:Not applicable</li> <li>Threshold quantity for the application of lower-tier requirements:50</li> </ul>	00 tons					
	- Threshold quantity for the application of lower-tier requirements:50						
	- Remarks:						
	The qualifying quantities set out above relate to each establishmen Articles are the maximum quantities which are present or are likely establishment only in quantities equal to or less than 2 % of the relev the total quantity present, if their location within an establishment is that establishment. For more details, see note 4 of Annex I of the S	to be present at any one time. Dangerous substances vant qualifying quantity shall be ignored for the purpose such that it cannot act as an initiator of a major accide	s present at an es of calculating				
73	SPECIFIC FND USE(S):						

## 3 <u>SPECIFIC END USE(S)</u>.

For the use of this product particular recommendations apart from that already indicated are not available.

8.1         CONTROL PARAMETERS: If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to det effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agen exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for t determination of dangerous substances.           - OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)           EH40/2005 WELS (United Year You and 2007         Year 20         WEL-STEL ppm mg/m3         mg/m3         mg/m3         Remarks           WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min). BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned). A4 - Non classified as carcinogenic in humans.           -         EIOLOGICAL LIMIT VALUES: Biological monitoring and be a very useful complementary technique to air monitoring when air sampling techniques alone may reliable indication of exposure. Biological monitoring is the measurement and assessment of hazardous substances or their me tissues, secretions, excreta or expired air, or any combination of these, in exposed workers. Measurements reflect absorption on substance by all routes. Biological monitoring in gue be particularly useful in circumstances where there is inkely to be significant absorption and/or gastrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protecti	ermine the should be s, and ne BMGV, A4 with a not give a tabolites in f a skin
SECTION 8: EXPOSURE CONTROLSPERSONAL PROTECTION         Section 8: EXPOSURE CONTROLSPERSONAL PROTECTION         Setting 1         If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determate to EN689, EV14042 and EN482 standard concerning methods for assessing the exposure by inhalation to chemical agene exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.         - OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)         EH40/2005 WELs (United Year WEL-TWA grm mgm2         Migdom) 2013       Year WEL-TWA grm mgm2         grm mgm3       Toluene         2007       75         WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min).         BMGV - Biological monitoring guidance value. BMCVs are non-statutory and any biological monitoring under taken in association guidance value index to a voluntary basis (ie with the fully informed consent of all concerned).         A - Non classified as carcinogenic in humans.       -         - BIOLOGICAL LIMIT VALUES:       Biological monitoring guidance value. BMCVs are non-statutory and assessment of hazardous substances or their me tissues, secretions, excreta or expired air, or any combination of these, in exposure burde subsection expired air any any combination of these, in exposure where there is likely to be significant absorption adding astrointestinal tract uptake following ingestion, where control of exposure depends on respiratory protective or where the	ermine the should be s, and ne BMGV, A4 with a not give a tabolites in f a skin
If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to dete effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference made to EN689, EN14042 and EN492 standard concerning methods for assessing the exposure by inhaliation to chemical agen exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for t determination of dangerous substances.         -OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)         EH40/2005 WELs (United Kingdom) 2018       Year       WEL-TWA pp       mg/m3 20       rsf          WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min). BMGV - Biological monitoring guidance value. BMGVs are non-statutory and any biological monitoring undertaken in association guidance value needs to be conducted on a voluntary basis (ie with the fully informed consent of all concerned).         A4 - Non classified as carcinogenic in humans.	e should be as, and ne BMGV, A4 with a not give a tabolites in f a skin
If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to dete effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference made to EN689, EN14042 and EN482 standard concerning methods for assessing the exposure by inhaliation to chemical agen exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for t determination of dangerous substances.         -OCCUPATIONAL EXPOSURE LIMIT VALUES (WEL)         EH40/2005 WELs (United Kingdom) 2018       Year       WEL-TWA pm       mg/m3       mg/m3         Toluene       2007       75       -       -         WEL - Workplace Exposure Limit, TWA - Time Weighted Average (8 hours), STEL - Short Term Exposure Limit (15 min). ## EXPOSURE CONTROLS: ENGINEERING MEASURES:

Provide adequate ventilation. Where reasonably practicable, this should be achieved by the use of local exhaust ventilation and good general extraction. If these measures are not sufficient to maintain concentrations of vapours below the Occupational Exposure Limits, suitable respiratory protection must be worn.

- Protection of respiratory system:

system Previous revision: 22/11/2022 Date of printing: 17/03/2023 Revision: 20/12/2022 Version: 9 SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES INFORMATION ON BASIC PHYSICAL AND CHEMICAL PROPERTIES: 9.1 Appearance Physical state: Liquid Colour: Colourless Odour<sup>.</sup> Characteristic Odour threshold: Not available (mixture). Change of state Melting point: Not available (mixture). Initial boiling point: 110,85\* °C at 760 mmHg Flammability: Flashpoint 6\* °C (Abel-Pensky) CLP 2.6.4.3. Lower/upper flammability or explosive limits: 1,19 - 7,05 480\* °C Autoignition temperature: Stability Decomposition temperature: Not available (technical impossibility to obtain the data). pH-value Not applicable (non-aqueous media). pH: Viscosity: Dynamic viscosity: 0,56\* cps at 20°C 0,22\* mm2/s at 40°C Kinematic viscosity: Solubility(ies): 0,0606696 g/l at 20°C Solubility in water Liposolubility: Not applicable (inorganic product). Partition coefficient: n-octanol/water: 2,73\* (as log Pow) - Volatility: Vapour pressure: 23,2\* mmHg at 20°C Vapour pressure: 12,3907\* kPa at 50°C Evaporation rate: Not available (lack of data). Density Relative density: 0,868\* at 20/4°C Relative water 3,18\* at 20°C 1 atm. Relative vapour density: Relative air Particle characteristics Particle size: Not applicable. Explosive properties: Vapours can form explosive mixtures with air and are able to flame up or explode in presence of an ignition source. Oxidizing properties: Not classified as oxidizing product. \*Estimated values based on the substances composing the mixture. 9.2 **OTHER INFORMATION:** Information regarding physical hazard classes Flammable liquids: Combustibility: Combustible. Other security features: Surface tension: 27,7\* din/cm at 20°C Heat of combustion: 10138 Kcal/kg VOC (supply): 100,0 % Weight 867,8 g/l VOC (supply): The values indicated do not always coincide with product specifications. The data for the product specifications can be found in the corresponding technical data sheet. For additional information concerning physical and chemical properties related to safety and environment, see sections 7 and 12.

# a.m.p.e.r.e. A.M.P.E.R.E SOLVENT ROAD MARKING PAINT® sustem Revision: 20/12/2022 Previous revision: 22/11/2022 Date of printing: 17/03/2023 Version: 9 SECTION 10: STABILITY AND REACTIVITY **REACTIVITY:** 10.1 Corrosivity to metals: It is not corrosive to metals. Pyrophorical properties: It is not pyrophoric. CHEMICAL STABILITY: 10 2 Stable under recommended storage and handling conditions. POSSIBILITY OF HAZARDOUS REACTIONS 10.3 Possible dangerous reaction with oxidizing agents, acids. CONDITIONS TO AVOID: 10.4 Heat: Keep away from sources of heat. Light: If possible, avoid direct contact with sunlight. Air: The product is not affected by exposure to air, but should not be left the containers open. Humidity: Avoid extreme humidity conditions. Pressure: Not relevant. Shock: The product is not sensitive to shocks, but as a recommendation of a general nature should be avoided bumps and rough handling to avoid dents and breakage of packaging, especially when the product is handled in large quantities, and during loading and download operations. 10.5 **INCOMPATIBLE MATERIALS** Keep away from oxidizing agents, acids. 10.6 HAZARDOUS DECOMPOSITION PRODUCTS: As consequence of thermal decomposition, hazardous products may be produced: carbon monoxide. SECTION 11: TOXICOLOGICAL INFORMATION No experimental toxicological data on the preparation is available. The toxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008~2021/849 (CLP). INFORMATION ON HAZARD CLASSES AS DEFINED IN REGULATION (EC) NO 1272/2008 : 11.1 ACUTE TOXICITY: Dose and lethal concentrations DL50 (OECD401) DL50 (OECD402) CL50 (OECD403) for individual ingredients: mg/kg bw Oral mg/kg bw Cutaneous mg/m3·4h Inhalation Toluene > 5000 Rat > 5000 Rabbit > 384 Rat ATE Estimates of acute toxicity (ATE) ATF ATF for individual ingredients: mg/kg bw Oral mg/kg bw Cutaneous mg/m3·4h Inhalation Toluene (\*) - Point estimates of acute toxicity corresponding to the classification category (see GHS/CLP Table 3.1.2). These values are designed to be used in the calculation of the ATE for classification of a mixture based on its components and do not represent test results. (-) - The components that are assumed to have no acute toxicity at the upper threshold of category 4 for the corresponding exposure route are ignored. - No observed adverse effect level NOAEL Oral NOAEL Cutaneous NOAEC Inhalation mg/kg bw/d mg/kg bw/d mg/m3 625 Rat Toluene - Lowest observed adverse effect level LOAEL Oral LOAEL Cutaneous LOAEC Inhalation mg/kg bw/d mg/kg bw/d mg/m3 2261 Rat Toluene INFORMATION ON LIKELY ROUTES OF EXPOSURE: ACUTE TOXICITY: Routes of exposure Main effects, acute and/or delayed Acute toxicity Cat Criteria Inhalation ATE > 5000 mg/m3 Not Not classified as a product with acute toxicity GHS/CLP Not classified available if inhaled (based on available data, the 3.1.3.6. classification criteria are not met). ATE > 2000 mg/kg bw Skin<sup>.</sup> Not Not classified as a product with acute toxicity GHS/CLP Not classified in contact with skin (based on available data, 3.1.3.6. available the classification criteria are not met). GHS/CLP Not available. Not classified as a product with acute toxicity Eves: Not classified by eye contact (lack of data). 1.2.5. Ingestion: ATE > 2000 mg/kg bw Not Not classified as a product with acute toxicity GHS/CLP Not classified available. if swallowed (based on available data, the 3.1.3.6.

classification criteria are not met).

A.M.P.E.R.E SOLVENT ROAD MARKING PAINT®

Previous revision: 22/11/2022

Date of printing: 17/03/2023

The information of this Safety Data Sheet, is based on the present state of knowledge and on current UE and national laws, as the users" working conditionsare beyond our knowledge and control. The product is not to be used for other purposes than those specified, without first obtaining written handling instruction. It is always the responsibility of the user to take all necessary steps in order to fulfil the demand laid down in the local rules and legislation. The information in this Safety Data Sheet is meant as a description of the safety requirements of the product and it is not to be considered as a guarantee of the product" sproperties.

## DISCLAIMER

Version: 9

The information contained in this sheet comes from reliable sources. It has been drawn up based on our knowledge at the time of the most recent update, as indicated. This information is intended as an aid to the user and should not be considered as a guarantee.

Conditions or methods of handling, storage, use or disposal of the product are outside our control, and we may not be held responsible for any loss, damage or expenses incurred as a result of, or in connection with, the latter.

All substances or mixtures can present unknown dangers and must be used with caution. We cannot guarantee that all dangers have been set out in an exhaustive manner.

This sheet has been drawn up for, and must be used for, this product only. If the product is used as a component in another product, the information given with it may not be applicable.

This sheet does not under any circumstances exempt the user from complying with all laws, regulations and administrative requirements related to the product, health and safety, and the protection of human health and the environment.
